9. **Contact person**
10. **Total amount** to be paid, including VAT
11. For a **detailed explanation** of the invoice scan the QR code

---

[1] Fixed environmental charge: because we care about the environment, all parts, products, fluids, packaging and accessories are sorted and collected by a specialized firm. This fixed charge is your contribution to the recycling costs.

[2] Point: a point is a set invoicing unit with a fixed price. For every operation (service or mechanical repair) a certain number of points is set by the manufacturer. The higher the number of points the more complex the work and therefore the more specialized the technician and the equipment used.
