Technical data

Discover the new electric Enyaq

The first Enyaq paved the way for Škoda's electric future. Now it drives into a new era combining a new, sleeker Modern Solid look with more efficient tech.

The most striking change is the new, sharp and stylish Tech Deck Face which replaces the more traditional grille of the previous generation. It is part of the new Modern Solid design language and it will be typical for the electric Škodas of the future. It is not all about looks, either. The new Enyaq is one of the most aerodynamic Škoda cars ever, boasting an aerodynamic coefficient of 0.261 (Enyaq), 0.225 (Enyaq Coupé). This is all combined with a battery line-up that goes up to 82 kWh, more than 580 km.

The interior elevates the tried and tested ergonomics of the previous version to another level. The focal point here is the Škoda infotainment system with 13" touchscreen, a new, smarter layout, and the possibility to download apps accompanied by the Virtual Cockpit, which comes as standard. To enhance comfort even further, the Advanced package includes features such as the augmented reality head-up display and Canton sound system.

The interior combines striking style with sustainability, using new and more eco-friendly materials.

With the new Enyaq, you can already drive and enjoy the future.

Electrifying style

Škoda's electric pioneer steps into a new era, adopting the latest Modern Solid design language. The sleek and stylish Tech Deck Face replaces the traditional front grille and gives the car an unmistakably electric look. The dynamic elegance is further underscored by the unique dark chrome accents on the lower bodywork – the front bumper on the Enyaq with a spoiler, aerodynamic side sills, and rear bumper with a diffuser.

Tech Deck Face

The Tech Deck Face is a modern, glossy black interpretation of the traditional Škoda grille, which also houses functional elements like front radar. It is flanked by the angular, dynamic running lights, while the main headlights are mounted lower.

Stylish rear

The new Modern Solid design language also comes with its own font, which is used for the Škoda lettering on the Enyaq's tailgate, replacing the traditional logo badge. The new font is also used for the model name and battery size on the lower part of the tailgate.

Rear lights

The actively illuminated crystalline shapes turn the Enyaq's taillights into shining jewels. The stunning effect is emphasised by the animated turn signals and Welcome and Goodbye effects when approaching or leaving your car.

Two-level headlights

While the LED daytime running lights are part of the new Tech Deck Face, the main headlights are positioned lower. They are incorporated into the air curtain intakes, highlighting the combination of great, dynamic looks and more efficient aerodynamics than ever before.

Virtual Pedal

Easy to open, even when your hands are full. The tailgate can be equipped with a Virtual Pedal which opens it with a simple kick under the bumper. Only available with power operated tailgate.

KESSY

Never leave your car unlocked again. The KESSY (Keyless Entry, Start and exit System) now not only lets you use all four doors to lock or unlock the car. With the Walk Away function, it also locks the car automatically as you leave its vicinity.

Your choice of style

The quiet speed of an electric vehicle is perfectly complemented by a refined and comfortable interior tailored to your taste. You can choose from six Design Selections, which combine refined style with eco-friendly materials such as Technofil or olive-tanned leather. For a truly unique style, details such as contrasting stitching or even orange seatbelts are available for some of the Design Selections. Driving sustainably can now be done in great style, too!

Cockpit of the future

Everything important right in front of you. The 5.3" Virtual Cockpit is designed to display all the key information while keeping it clean and easy to digest. Besides standard driving data, you can highlight navigation, driving assists, or both. Everything can also be displayed on the augmented reality head-up display, like the "floating" navigation arrows.

Enjoy full control

Everything you need to know, exactly where you need it. The combination of Virtual Cockpit, 13" infotainment display, and augmented reality head-up display allows information to be sorted by importance, so it's easy to focus on what's most important while still keeping track of everything else.

Infotainment

The world at your fingertips. The new infotainment system now provides a more customisable experience and features an improved menu structure, three basic buttons for easy access, and redesigned navigation. The 13" touchscreen remains and still offers sharp looks and smooth performance.

Electric seats

Perfectly tailored comfort for all. Electric adjustment makes it easy to find the seating position that is perfect for you, while the carefully designed shape offers ample lateral support while still retaining a cushy and comfortable feel.

The new steering wheel

The Modern Solid Škoda lettering on the centre is the new focal point of the Enyaq's steering wheel. It is multifunctional and comes with leather upholstery as standard.

Always charged

The phone box provides wireless 15 watt charging for your smartphone with cooling to prevent your device from overheating. This compartment is easily accessible and offers space for a second smartphone beside the one being charged.

Jumbo Box and centre console

Electronic devices can be safely stored in the Jumbo Box in the front armrest, while small items can be placed in a removable tray. And when the air conditioning is on, you can even cool your snacks. There are also two easy-open cupholders.

Connectivity

Always stay in the picture. With MyŠkoda application, you can access important information about your car and control it remotely from your phone. The new Enyaq also comes with Pay to Park and Plug & Charge functions. With Apple CarPlay or Android Auto, you can safely and easily use selected smartphone apps on the infotainment screen.

Panoramic roof

Enjoy the view of the skies. The optional panoramic roof offers not only great views, but also lets more light into the cabin, making it feel much more airy. In the standard Enyaq, the front part can be opened, while in the Enyaq Coupé, the whole glass roof is fixed in place.

Smart ideas for every day

Every day can be made better with smart ideas. The Enyaq offers a long list of ingenious details that will surprise you and make your life on the road that much easier.

Rear seats

Your passengers in the rear can also enjoy the true comfort of the Enyaq. Ample room is standard, with the option to upgrade to heated outer seats and leather upholstery for maximum comfort. For little passengers, there are Isofix mounting points on the outer seats.

Boot space

In its standard configuration, the Enyaq offers 585 litres of cargo space, or 570 litres in the Enyaq Coupé version. If you need even more space, you can increase the useable volume to 1,711 litres for the standard version and 1,610 for the Enyaq Coupé by folding down the rear seats. And it is not just about space – with its various smart features and compartments, the Enyaq takes the ease of transporting both small and large things to another level.

Net programme

Keep your cargo neatly organised with the help of the net programme. A set of elastic nets on the bottom and the sides of the boot, as well as on the rear seat backs, will keep your luggage and other cargo safely in place. This means you will always find what you are looking for and nothing gets damaged from moving about.

Turn Assist and Collision Avoidance Assist

Turn Assist monitors opposing traffic when turning left at low speeds between 2–15 km/h. In critical situations, it can stop the vehicle and turn on the warning lights. Collision Avoidance Assist supports the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing the accident with a controlled evasive manoeuvre.

Travel Assists

The Travel Assist system as well as its higher version combine the functions of several assistants and ensure that you feel safe and comfortable, no matter where you drive. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel.

Door Opening Warning

When you stop your car and open the door (to get out), the system can detect other road users, such as vehicles, cyclists, runners, pedestrians, etc. up to a distance of 35 m. If it detects an approaching object, it warns the crew in the front and rear, both visually and audibly, about getting out of the vehicle.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Trained Parking

A highly advanced parking assistant is used to automatically complete a parking manoeuvre in a familiar environment, e.g., at home. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to the garage or a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself. You simply monitor it from the driver's seat.

Intelligent Park Assist

Let your car find and offer you parking spaces. Select one and then just sit back and watch. The Enyaq will autonomously drive itself into the parking space, without the driver having to touch the wheel or pedals.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Remote Trained Parking

Train your car to perform a parking manoeuvre and oversee the process from the outside. Remote Trained Parking is a highly advanced parking assistant which enables the car to perform familiar parking manoeuvres without the driver being present in the car. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to the garage or a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself, as long as you stay next to it and monitor the process for safety. You simply monitor it from the outside, using your phone app.

Remote Parking

Let your car park itself while you just watch from the outside. With Remote Parking Assist, you can use the Intelligent Park Assist feature to park in parallel or perpendicular spaces. Finally, you can move the car in or out of the parking space. For safety, the driver needs to watch the whole process and control the car by keeping the button in the app pressed.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Sportline

Energise your drive

Do you want an efficient and eco-friendly car, or a fun one? Have both! The Enyaq Sportline adds sporty style to its looks with blacked-out trim and side mirrors, unique badge, and specific wheels. The Sportline Design Selection is available for all battery versions.

Style and functionality

The most typical attributes of the Enyaq Sportline version are the black glossy features, such as the exterior rear-view mirror caps, side window frames, roof rails, and Škoda lettering on the tailgate. Together, they bring more

dynamism and emotion to the vehicle's appearance. The full LED Matrix headlights and Vega 20" alloy wheels come as standard. The final touch is the black Sportline badge on the tailgate.

Sporty and efficient

The Enyaq Coupé is not only more efficient thanks to its sleeker aerodynamics, it's also perfectly suited for the more dynamic style of the Sportline version. The glossy black features, such as exterior side-view mirror caps,

side window frames, Sportline badge and lettering on the tailgate perfectly complement the leaner and sportier look. All of this is underscored by the Vega 20" alloy wheels offered as standard.

Comfortably zoomed

Fancy more dynamism and exclusivity in your everyday commute? The Sportline interior comes with black artificial leather and Suedia upholstery with grey stitching. The Carbon décor brings the whole effect over the finishing line.

Design Selections

Loft interior

Clip Soul pad with grey stitching
Alu Brushed décor
Grey fabric/Clip Soul grey leatherette

Design Selection Loft

The seat upholstery combines artificial leather with grey embossed fabric. It is tastefully complemented by the Alu Brushed décor on the dashboard and Clip Soul dashboard pad.

Lodge interior

Grey artificial leather pad with orange stitching
Fairy Dust décor
Grey artificial leather/black Technofil upholstery

Design Selection Lodge

The seat upholstery in a combination of artificial leather and Technofil recycled fabric in black and grey contrasts with the orange stitching and seatbelts. The Fairy Dust décor on the dashboard and doors is complemented by the grey artificial leather dashboard pad with orange stitching.

Lounge interior

Leatherette/Suedia Grey pad with Grey Mint stitching
Mutant Cocoon décor
Leatherette/Suedia Grey mint upholstery

Design Selection Lounge

The seat upholstery in a combination of artificial leather and Suedia Grey details, including stitching, creates an unmistakable look. The style is underscored by the Mutant Cocoon décor and Suedia Grey décor.

Suite interior

Leatherette pad with Cognac stitching

Diacut Cross décor

Black leather/leatherette upholstery with Cognac stitching

Design Selection Suite

The black leather upholstery with Cognac stitching makes the interior look and feel luxurious. This is further emphasised by the Diacut Cross décor on the dashboard and black leather dashboard and door pads with contrasting brown stitching as a finishing touch.

EcoSuite interior

Leatherette pad with Cognac stitching
Diacut Cross décor
Cognac leather/leatherette upholstery with Cognac stitching

Design Selection EcoSuite

The Cognac leather upholstery with contrasting stitching makes the interior look and feel luxurious. This is further emphasised by the Diacut Cross décor on the dashboard and Cognac leather dashboard and door pads with contrasting stitching as a finishing touch.

Sportline interior

Leatherette pad with grey stitching
Carbon décor
Suedia/leatherette upholstery with grey stitching

Design Selection Sportline

For a more dynamic feel, the Sportline Design Selection combines leather and Suedia upholstery with contrasting grey stitching and adds Carbon décor as a final sporty touch. The dashboard and door pads combines leatherette with contrasting stitching.

Accessories

Genuine Accessories that perfectly fit your car

Just like perfectly tailored clothes, the Enyaq needs a few finishing touches to make it truly yours. Fine-tune your Enyaq to your exact taste and needs with Škoda Genuine Accessories and enjoy a one-of-a-kind experience.

Enhance the looks with a choice of wheels and design details like mirror caps or specific door sills. Give the interior a more upscale look with premium carpets or make it more rugged with all-weather mats.

There are also other ways to make your life easier. A plethora of holders, hooks, charging cables, and smart ideas like door-mounted bins and entertainment packages for rear passengers will make your travels a real joy.

The safety of you and your passengers, big and small, as well as your four-legged friends, is always our first priority. That's why we offer not only a comprehensive range of child seats, but also seatbelts for your dogs.

Anything you need to take with you will find its secure place in the boot thanks to various clever features and ideas.

Make your Enyaq just perfect for you.
